HISTORY

Bravat, By Dietsche was born in Black Forest, Baden – Wuerttemberg, Germany a region which has always been known for its history and culture of technological innovation and sophisticated machinery, where world famous enterprises such as Mercedes Benz, Bosch and Porsche are headquartered.

138 years ago, on the mysterious land of Black Forest, the founder of Roman Dietsche established a professional enterprise engaged in the production of bathroom accessories. Several decades later Bravat was launched by Dietsche to meet the demands of the global faucets and sanitary ware market. Bravat combines state of the art German engineering and manufacturing technologies with cutting edge international design and delivers trendy products that meet the most demanding clients' needs and aspirations.

Bravat's International design and engineering team gathers various talents from around the world. Bravat gains from it's group team of 14,000 people from different nationalities working across 21 facilities in 7 countries.

The most competitive advantage of the enterprise lies in its research, innovation, specialized production, supporting capacity, high quality, cost performance, product design and display capacity. It has set up 3 major R&D manufacturing bases in Germany, Europe and China, covering a total area of approx. 4,50,000 sq.m.

Bravat Bathroom Accessories is committed to giving its customers a brand new experience in bathroom. Bravat has 4 branches worldwide in Germany, Russia, China and India.

Whirlpool

Most quality homes constructed today have a whirlpool-jetted (Jacuzzi) bath installed. Some families enjoy the jacuzzi spa as a place to gather and play. Others enjoy their spa as a place to relax and unwind. Jacuzzi spas have been proven to reduce stress, anxiety and tension.

A Jacuzzi bath is excellent for Hydromassage therapy. The specially designed Bravat Whirlpool pump mixes Air and water in the appropriate ratios and pumps the water with a lot of pressure through specially designed hydrotherapy jets that are installed in a bathtub. The resulting effect being, millions of pressurized water and Oxygen rich bubbles coming through each of jets providing a stimulating whirlpool massage. A jacuzzi bath is known to have the following health benefits:

- It stimulates the microcirculation in the veins and is advised in the condition of swelling of the lower limbs.
- It improves the blood flow and removes the toxins from the body.
- It relieves muscular tension and relieves pains in the joints.
- It improves the overall muscle tone of the body.

Motor

The Bravat whirlpools are made of high temperature resistant polypropylene. They are thermally protected and do not get affected by the temperature of the water. The motor on reaching an ambient of 40°C automatically trips and restarts on cooling.

028

BWPA-4 Heater

Single phase, inline heater with dry run protection (used for maintenance of temperature in massage bath while operation).

Massage Jet

This is the original water massage technique. The water contained in the tub is sucked by a pump into a circuit and forcibly reintroduced into the tub through special jets. These jets of water mixed with air are in a fixed position, but their direction can be changed by manually.

Push Button with Turbulence Control

Non-electrical air-switch for the safe operation of the massage bath.

Air Pool Jet

A sophisticated system that uses the effect of blown air, as in natural "geysers". Jets of air are emitted from a series of valves located at the bottom of the tub. This effect is obtained by means of a blower which generates hot air and helps to keep constant the temperature of the water in the tub. The gentle action of the bubbles envelops the whole body. The result is like fingers of water providing a gentle full-body massage.

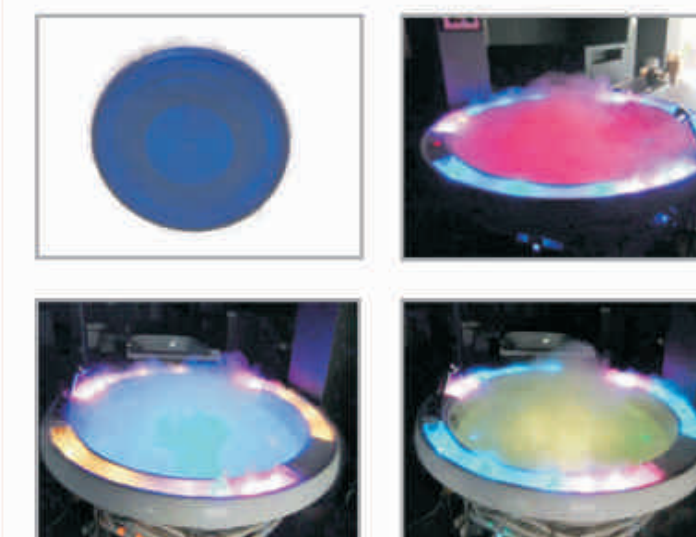

Model	Features
BWP 1	1.0 HP pump, On/Off Pneumatic Switch, Turbulence Controller
BWP 2	1.5 HP pump, On/Off Pneumatic Switch, Turbulence Controller
BAP-1	1.0 HP pump, Bubble Bath, On/Off, Pneumatic Switch, Turbulence Control, Non Return Valve.

Optional Accessories

1. BWPA 1 Bath Tub Waste
2. BWPA 2 Under Water Light
3. BWPA 3 Faucet Kit (A)*

BWPA 1 : Bath tub over flow and pop-up waste

BWPA 2 : Low voltage water proof light with chromatherapy.

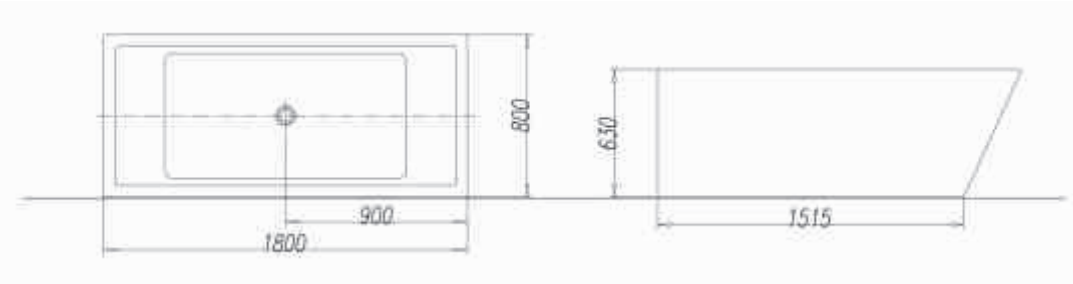

BWPA 3 : Low voltage water proof light with chromatherapy.
