## HISTORY

Bravat, By Dietsche was born in Black Forest, Baden – Wuerttemberg, Germany a region which has always been known for its history and culture of technological innovation and sophisticated machinery, where world famous enterprises such as Mercedes Benz, Bosch and Porsche are headquartered.

138 years ago, on the mysterious land of Black Forest, the founder of Roman Dietsche established a professional enterprise engaged in the production of bathroom accessories. Several decades later Bravat was launched by Dietsche to meet the demands of the global faucets and sanitary ware market. Bravat combines state of the art German engineering and manufacturing technologies with cutting edge international design and delivers trendy products that meet the most demanding clients' needs and aspirations.

Bravat's International design and engineering team gathers various talents from around the world. Bravat gains from it's group team of 14,000 people from different nationalities working across 21 facilities in 7 countries.

The most competitive advantage of the enterprise lies in its research, innovation, specialized production, supporting capacity, high quality, cost performance, product design and display capacity. It has set up 3 major R&D manufacturing bases in Germany, Europe and China, covering a total area of approx. 4,50,000 sq.m.

Bravat Bathroom Accessories is committed to giving its customers a brand new experience in bathroom. Bravat has 4 branches worldwide in Germany, Russia, China and India.

Bravat's International design and engineering team gathers various talents from around the world. Bravat gains from its group team of 14,000 people from different nationalities working across 21 facilities in 7 countries. The most competitive advantage of the enterprise lies in its research, innovation, specialized production, supporting capacity, high quality, cost performance, product design and display capacity. It has set up 3 major R&D manufacturing bases in Germany, Europe and China, covering a total area of approx. 4,50,000 sq.m.

**Inspiration originates from differences.**

Bravat achieves wonderful combinations between reality and Fantasy, thus gives new life and experiences to products.

## **Bravat's Global Strategic Goal**

**To be the world leader in designer & affordable luxury in the bathroom solutions.**

### Some Prestigious Projects

**BRAVAT** uses the latest Technologies to produce World Class Bath Fittings and meet or exceed the most Stringent International Quality Standards.

The USP for **BRAVAT** is trendy designs, state of the art technology, impeccable quality at affordable prices. **BRAVAT** in India aims to be the trendsetter in affordable design and luxury.

## Unique Features of Bravat Single Lever Bath Mixers :

1. High Flow Rate. Suitable for Rain Showers, Body Jets etc.
2. 3 Outlets Standard. Can run 3 Items from Single Bath Mixer i.e: Shower, Spout, Body Jets, Hand Shower etc. No need for button spout.
3. Temperature limit cartridge as a safety feature.

## Unique Features of Single Lever Basin Mixer:

1. 2 Stage Water Saver Cartridge. Low Flow and High Flow to promote Water Saving.
2. Self Cleaning Aerator.
3. All series available in Standard Height, Tall body and Wall Mounted version.

## Unique Features of Wellness Bath Mixers:

1. Thermostatic Mixer.
2. High Flow Rate. Upto 53 liters/ minute, to ensure sufficient water flow for big Rain Showers, Waterfall, Body Jets etc.
3. 4 Outlets (can be operated at the same time).

## Unique Features of the Oxyrain showers:

1. All Shower Heads with Air Water Mixing to simulate the Real Rain Effect.
2. Water Saving Technology. 30% lesser Water Consumption.
3. Ultra Thin Design.

## Mixing Water Outlet

Hot Water Inlet

Pressurized Cold Water Inlet

**Problem:** Cold Water Pipe is Pressurised and the Hot Water is not pressurised due to Piping through Geyser or Solar Heater. Hence, Resulting in :

- Unstable Water Temperature
- Low Water Flow/ Reverse Flow.

**Solution:** Bravat's Jetap Technology solves this problem with ease. Using a special patented technology the specially designed mixer in the Jetap series, balances the volume and pressure of cold and hot water automatically to deliver warm mixed water at the desired temperature without any pumps or electricity.

**Benefits:**

| Testing Conditions | Outlet water flow | Outlet water temperature | Cold water pressure | Hot water pressure | Cold water temperature | Hot water temperature |
|--------------------|-------------------|--------------------------|---------------------|--------------------|------------------------|-----------------------|
| Testing data       |                   |                          |                     |                    |                        |                       |
| Jetap              | 5.2 L/Min         | 40 °C                    | 0.05 Mpa            | 0 Mpa              | 12 °C                  | 55 °C                 |
| Common tap         | No hot water      | 40 °C                    | 0.05 Mpa            | 0 Mpa              | 12 °C                  | 55 °C                 |

- Stable Water Temperature
- Economical Price
- Anti Scaling

- Good Water Flow
- Suitable for the Retrofit market also
- No Reverse Flow
- Anti Scalding

# Master Steam

A steam bath is excellent for health and is very enjoyable as well. A steam bath is especially recommended to alleviate medical conditions like Bronchial Asthma, Bronchitis, Catarrh of the upper respiratory tract, coughs, hoarseness, non-acute rheumatic conditions by virtue of its high steam content and the general benefits of moist heat.

In addition, the steam bath is also known to have the following health benefits:

- Relieves stress, mental fatigue and tension.
- Revitalizes the body and mind, relieves allergies.
- Burns calories, aids weight loss conditions heart.
- Relieves nasal, sinus & chest congestion/ allergies.
- Induces a deeper more relaxing sleep.
- Deep cleans ridding your body of wastes.
- Impurities within internal organs are flushed out
- Cleanses skin and aids in skin ailments such as acne, eczema & other wounds
- Helps maintain clear, healthy skin and provides an afterglow of a rosy complexion

## Smart Control

- Power Control / Steam Control
- Temperature Controls / Timing Controls
- Display Temperature / Timer
- Built in Temperature Sensor
- Ergonomic Soft Touch Switch
- Low Voltage Control for Steam

## Steam Bath

- Teflon Coated Heating Element : Long Lifespan
- Quick Steam : Steam within 2 minutes
- AutoDrain / AutoClean : For Clean Steam every time.
- Dry Run Protection.
- Overheat Protection. Auto Cutoff.
- Smart Control Comptible.
- Single Smart Control for Multi Steam (Upto 4 nos)
- Multi Smart Control for Single Steam.
- Temperature / Timer Control

## Aroma Steam

The Aroma Steam-stemhead allows for a quieter, calming steam bath. It includes a reservoir for eucalyptus or other scents for a unique aroma therapy experience. The unique design balances the distribution of steam and essence during steam bathing.

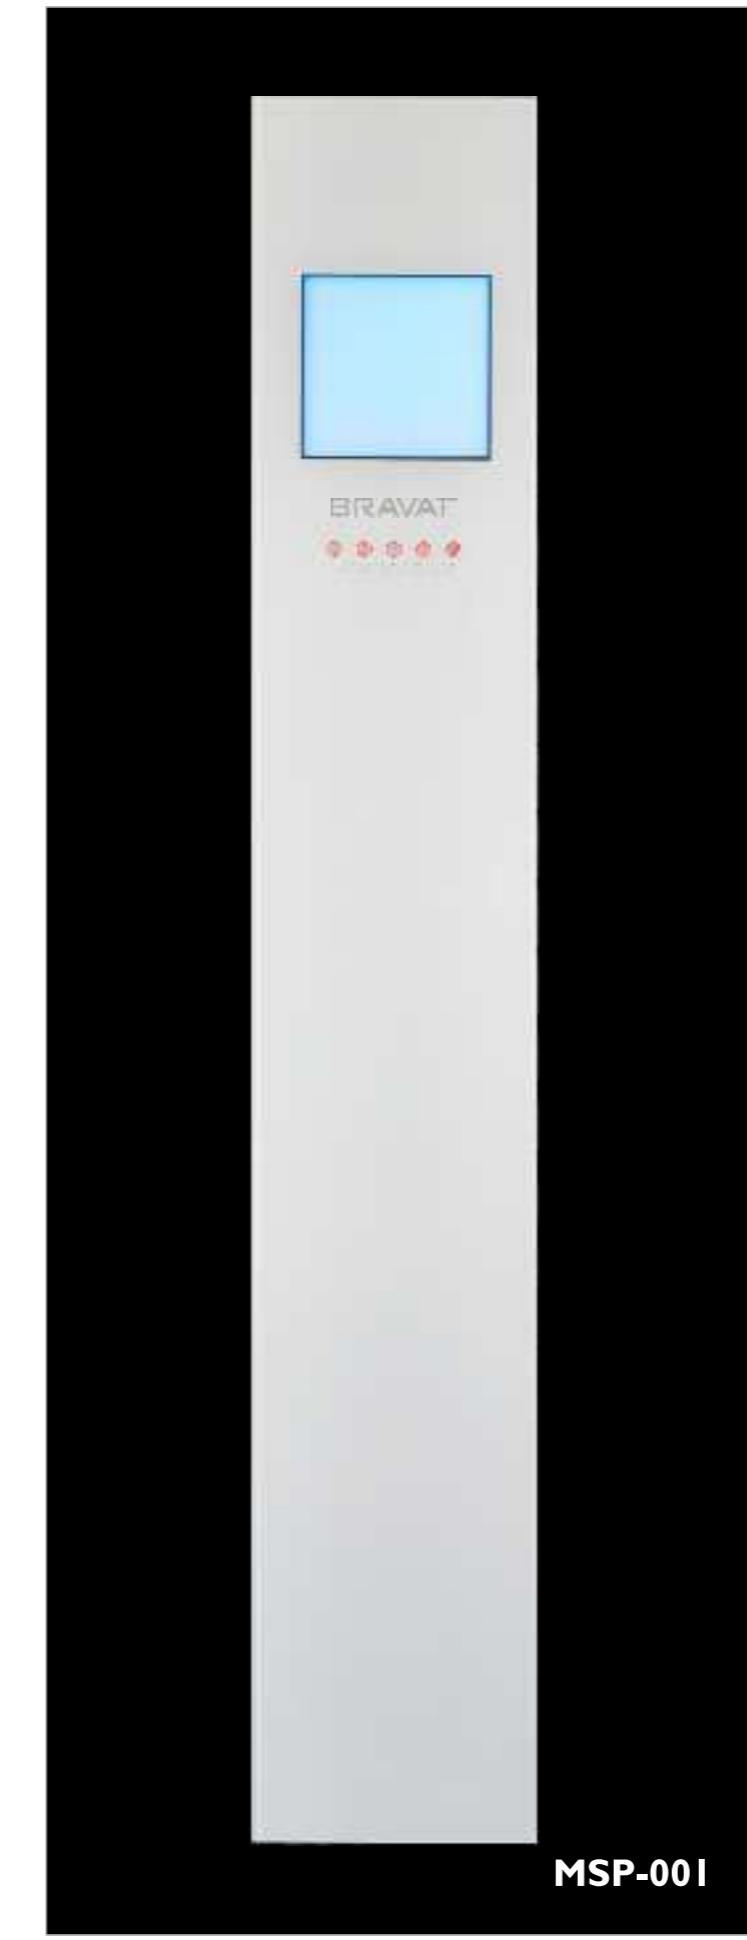

| Model  | kW / V / Phase | Room Size (cu ft) |
|--------|----------------|-------------------|
| MS-45  | 4.5/240/1      | 150-250           |
| MS-60  | 6/240/1        | 250-350           |
| MS-90  | 9/240/1        | 350-450           |
| MS-120 | 12/440/3       | 450-650           |

# Drain/Smart Drain/ Smart Drain +

**BRAVAT**  
BY DIETSCHEN 1873

## QUALITY AND FUNCTIONALITY

BRAVAT presents you SMART DRAIN with its sophisticated solutions that meet the needs of many designers and architects. New SMART DRAIN unites several modern solutions and represents a complete solution for water drainage in the modern bathroom. It is produced with one, two or three inputs and output with adjustable angle. Siphon design is created with high functionality, in order to prevent the entrance of sewer gases, even in cases when the water completely evaporates in the drain.

On the body of the drain it is possible to install carrier of waterproofing that provides assembly in a manner that completely prevents the entrance of water between the drain and the surrounding concrete. Height of a drain may be increased virtually unlimited by inserting a tube with a diameter of 110mm between the body of a drain and drain grid.

## FEATURES OF SMART DRAINS / SMART DRAIN + :

- Unique Drain Cover design provides flexibility for use as SS Finish / Glass Insert / Tile Insert
- Modern solution for modern methods of construction
- Easily adjustable installation height / adjustable angle of the pipes
- Up to three connectors for entrance of water into a drain
- Modern design that stops the gas from sewage even when water from the pipe evaporates
- Possibility of mounting a carrier of waterproofing
- The inner diameter of the drain corresponds to the pipe with a diameter of 110 mm so that pipe grid may be set away from the body of a drain
- The mechanism of the drain itself is thinner and takes up little space under the floor
- High flow
- Drain is modular - each element of the superstructure corresponds to each base, allowing easy adaptation to various needs of the specific project
- A simple model, with good features and safety systems
- Created from quality materials with a high level of system security

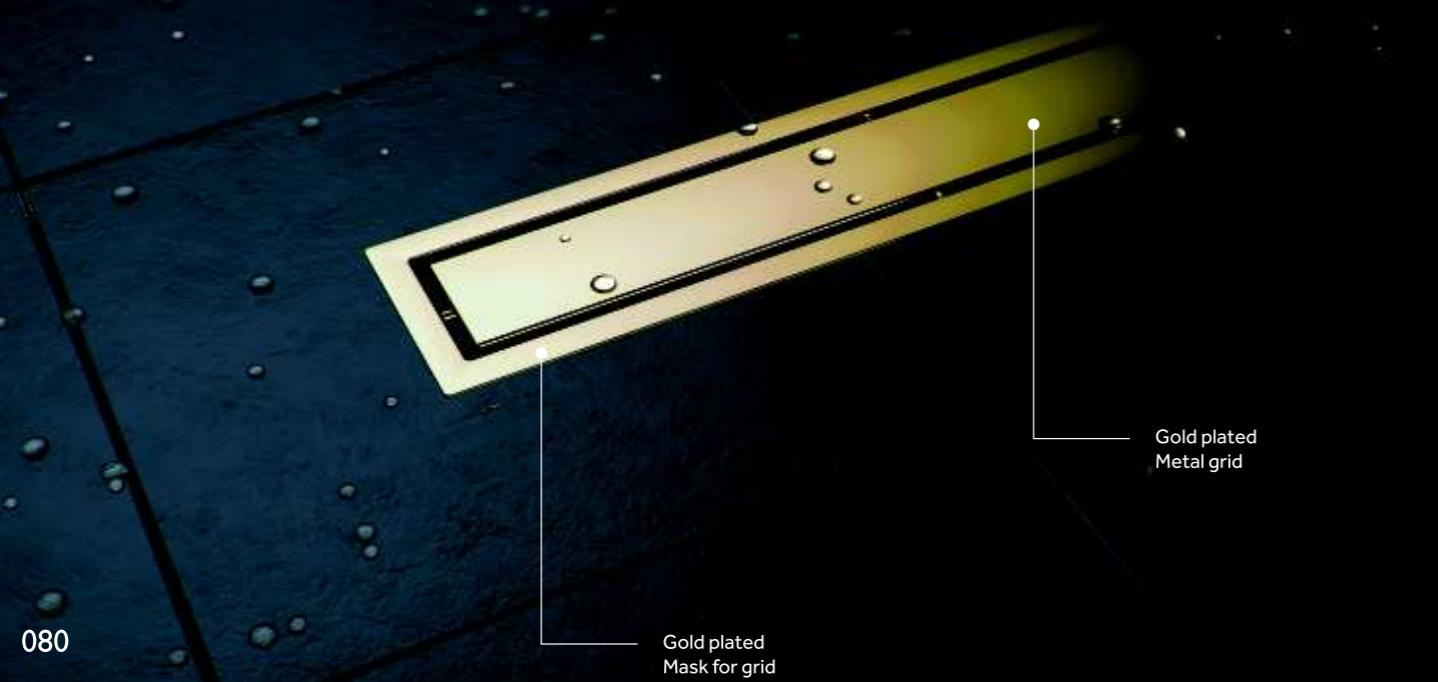

## ADVANTAGES IN THE DESIGN AND USAGE

SMART DRAIN is manufactured from high quality POLYPROPYLENE, material that is very suitable for high-quality drainage system, which has the following characteristics: high compressive strength, light weight, it is environmentally friendly, corrosion resistant, impact and heat resistant, easy to maintain, resistant to number of chemicals.

SMART DRAIN is designed carefully and with precision in order to improve the quality of all elements, extend the life of the product, ensure good flow capacity. For SMART DRAIN grounding is not necessary, because polypropylene does not conduct electricity.

The great advantage of the SMART DRAIN is the position of the connector for outflow that is positioned at the same height as the surface, which allows a complete cleaning of body of a drain from sediment. SMART DRAIN is characterized with easy installation and ability to upgrade after installation. A large number of extensions (plug-ins) allow the fulfillment of all requirements at the installation.

In order to ensure that every requirement of drainage is fulfilled, professional team of BRAVAT is always ready to respond to each specific request and thus create customized solutions.
