Please  
notice:

**OGRO**  
has  
become  
**DORMA**

## Our door furniture now comes under a new name: OGRO has become DORMA.

And that means that you will continue to be able to select from a range of quality products provided by a system supplier with 100 years of experience and known the world over for refined solutions in door and allied applications. As a result of the incorporation of the OGRO portfolio within the DORMA product range, we can offer you all the advantages of an internationally established, strong brand.

- Even closer access to the innovative power of the world market leader for door control hardware, movable walls and glass fittings and accessories. And in the automatics sector, too, the DORMA group of companies is part of the global elite.
- Participation in the international renown of the DORMA brand.
- Alignment to national and international specifications with a door furniture portfolio restructured under the product brands Premium, Plus and Pure.

So you can still rely on the quality promise that comes with our modern door furniture, combined with the benefits of an integral design style throughout the entire building.

## A portfolio worthy of the name.

For timber doors

For narrow stile doors

### The extensive DORMA Plus range.

The DORMA Plus range is characterised not just by its quality and design excellence but also by its diversity. Hence, the Plus portfolio also contains a number of popular lever handle models for the project sector.

### Designed for daily door usage.

With the Plus range of hardware, DORMA has once again shown that economic, cost efficient solutions can be effectively applied to meet standard design requirements throughout the build. This door furniture series is particularly suitable for use on functional project doors. Plus fittings offer complete dependability in keeping with the DORMA quality standard.

### Materials that impress.

Aluminium or stainless steel? Irrespective of which material you select, with DORMA Plus you choose a contemporary solution of "fitting excellence".

Aluminium F1 silver (natural)

Satin stainless steel

### The DORMA Plus product range encompasses:

- Furniture sets for standard, entrance (knob and handle) and WC doors
- Square section spindles 8 mm and 9 mm thick
- Roses with springing for narrow stile doors

- The lever handles and steel mountings are supplied as factory-assembled units
- Profiles are available to suit PZ (euro-profile), BB (warded key), WC (bathroom lock) and UN (latch-plate)

- For door thicknesses of 38–70 mm
- Mountings with support lugs for timber doors
- EN 1906 Category of use grade 4 Corrosion resistance grade 4

# Premium 8928

■ Design: Prof. W. Wagenfeld

## Noticeably inconspicuous.

**DORMA Premium with its minimised shadow joint.**

Classic styling never ceases to fascinate. And this is epitomised by Premium door furniture, the harmonised elegance of which is particularly evidenced by the minimised shadow joint between the lever handle and the rose or backplate cover, giving the assembly the appearance of visual integrity.

**For timber doors**

**For narrow stile doors**

Premium 8906

■ in F1 aluminium

## Designed to a perfect finish.

### DORMA Premium with the Satino surface in aluminium.

The more sophisticated the design of a detail, the greater its beneficial effect on the whole. The Satino finish in aluminium is an impressive case in point. The combination of high grade material,

true craftsmanship and such a finely satinised surface creates a unique elegance. The result: the complete furniture set blends harmoniously into the design of the door.

### Reliable quality down to the last detail.

The aluminium fittings are anodised and coloured using an in-house process that provides a thick oxide layer, which gives very effective protection against weathering, wear and tear.

Colour F1 anodised silver

Colour F3 brass

Colour F4 bronze

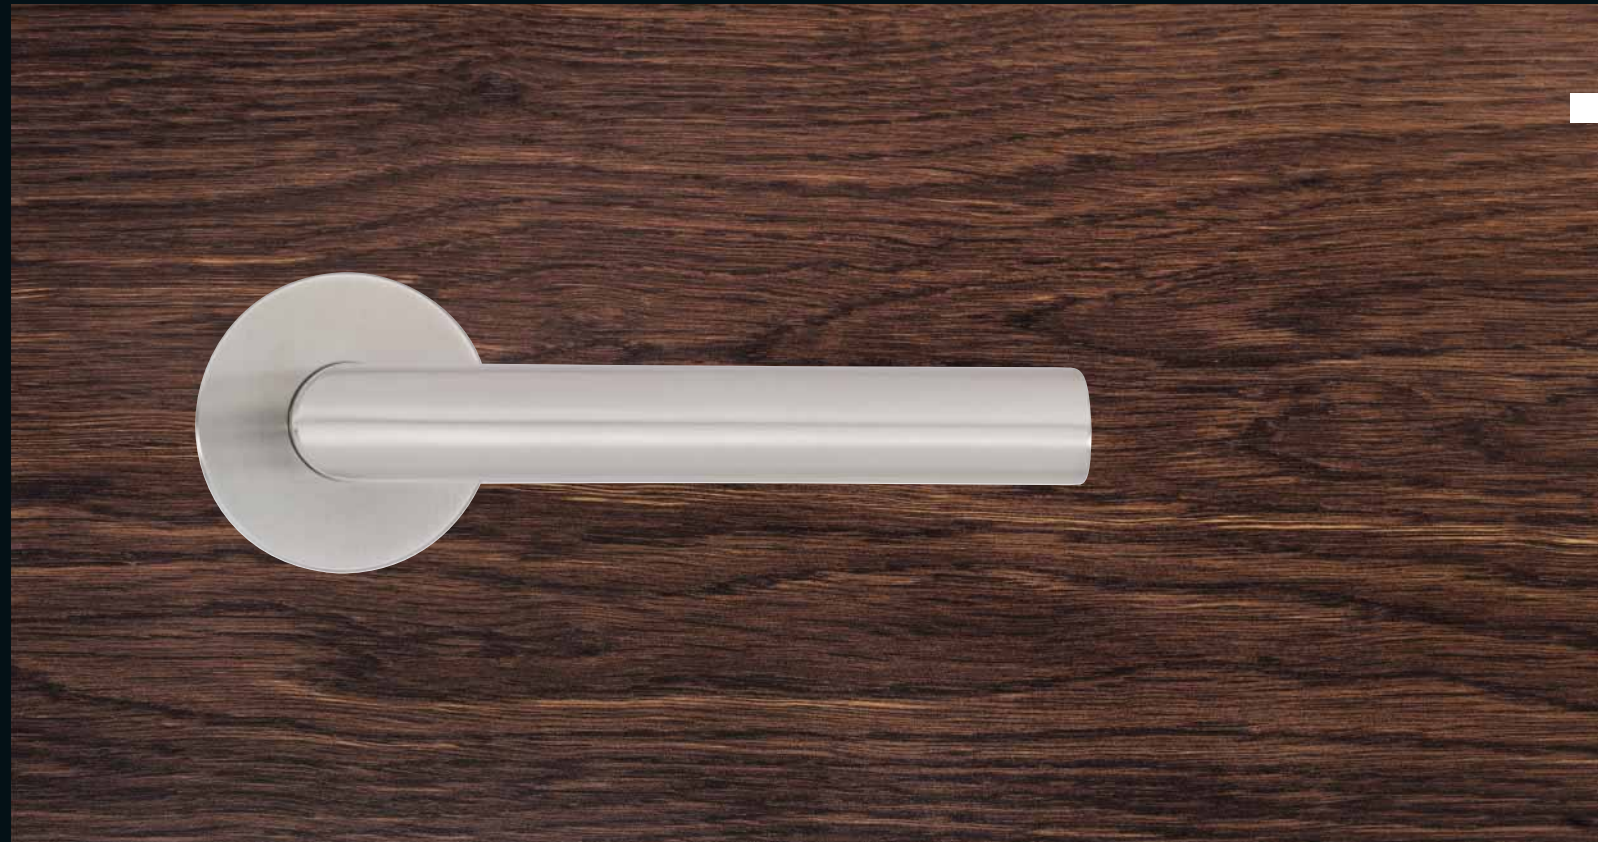

Colour F5 dark bronze

Simulated satin stainless steel

Premium 8906

■ in satin stainless steel

## Elegant yet discreet.

### DORMA Premium with Satino finish in stainless steel.

DORMA Premium door furniture exudes all that is good about stainless steel: quality combined with timeless aesthetics. Typical yet impressive DORMA characteristics with which to further enhance the independence and creativity of the project design through to the very last detail.

### Resilient in character.

DORMA door furniture manufactured from stainless steel is characterised by its satinised surface. This provides it with a high quality appearance while at the same time rendering it resilient, resistant and reliable in meeting the high demands that are placed upon it.

## DORMA Premium – always holds the line.

### Horizontal return springing.

The technology incorporated into the Premium door furniture range is designed for withstanding heavy wear and tear in heavily frequented buildings. Four springs ensure that the lever handle will always return to the horizontal position even under conditions of robust, repeated usage. The continuing stability of the lever handles is ensured even when exposed to high mechanical loading while the sophisticated technology ensures maximum ease of use.

### The advantage of individual choice.

Premium lever handle sets are supplied for timber doors with springing on one side as standard. Narrow stile doors are equipped with horizontal return spring mechanisms on both door sides.

Other arrangements are available on request.

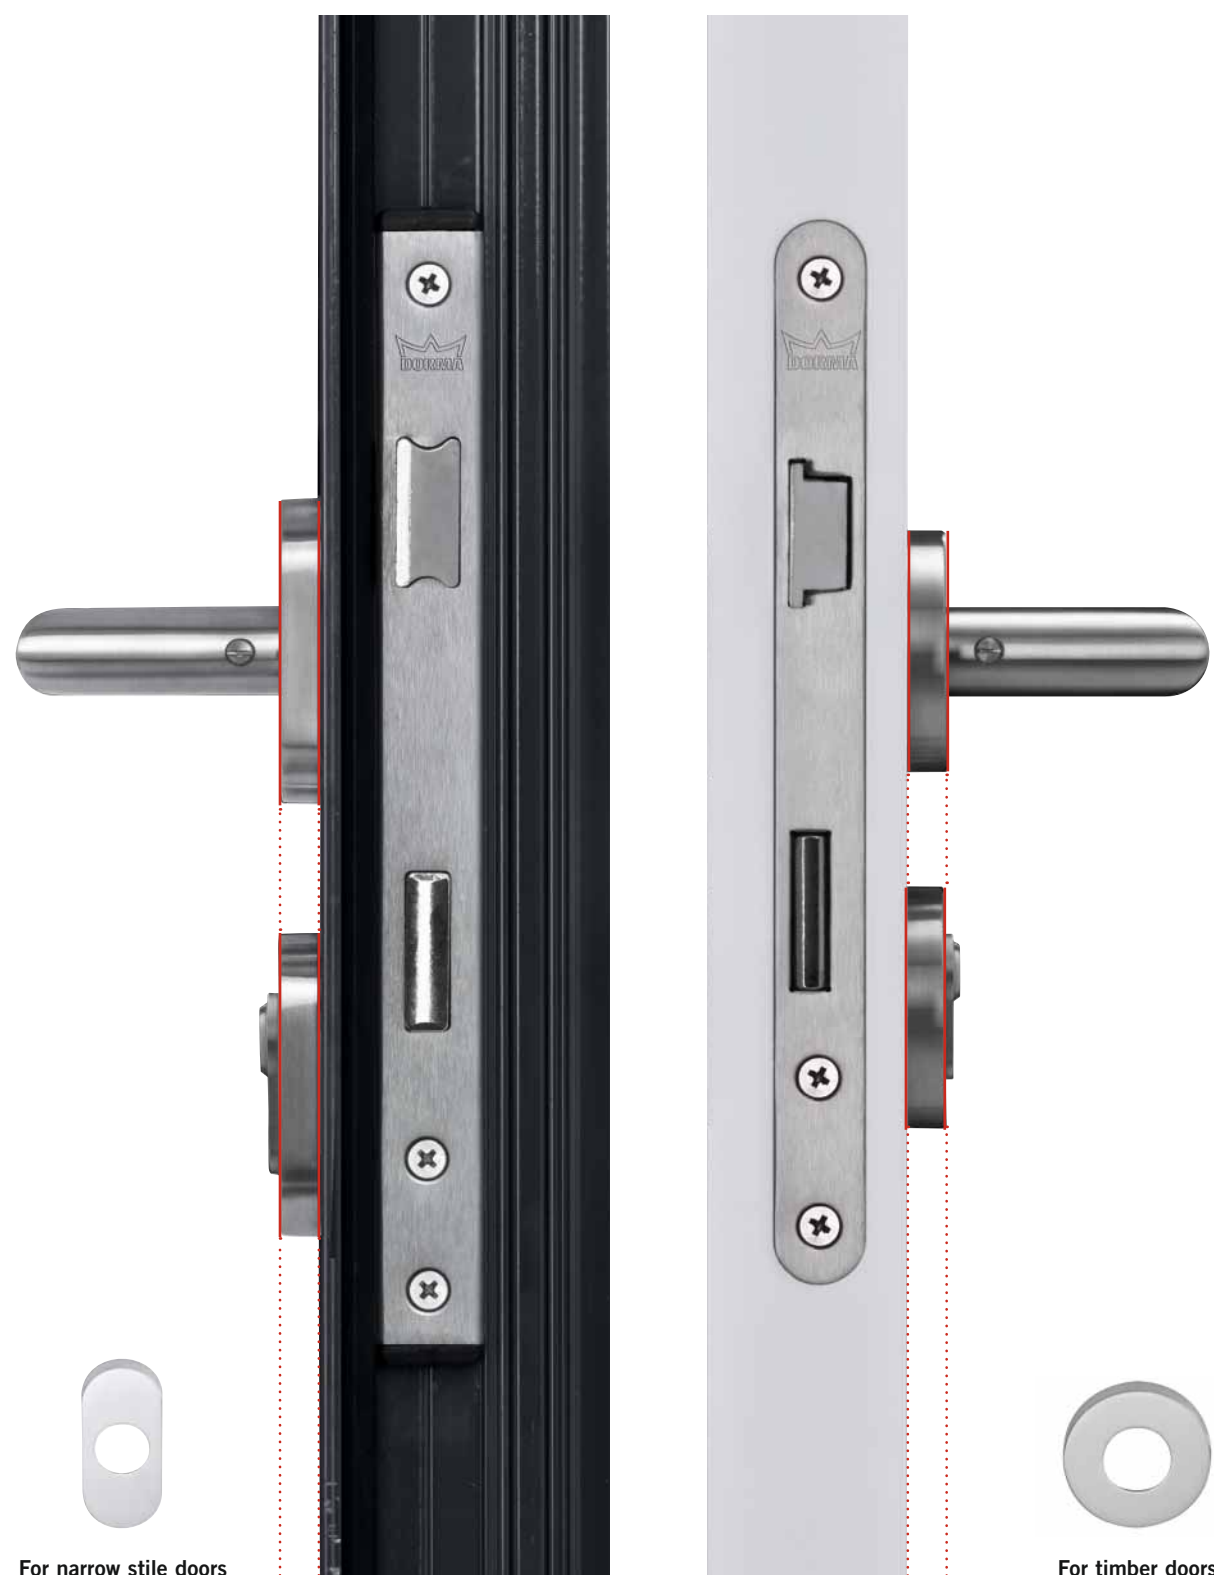

For timber doors

For narrow stile doors

For narrow stile doors

For timber doors

9 mm

The roses, escutcheons and backplates all exhibit a uniform height of just 9 mm.

9 mm

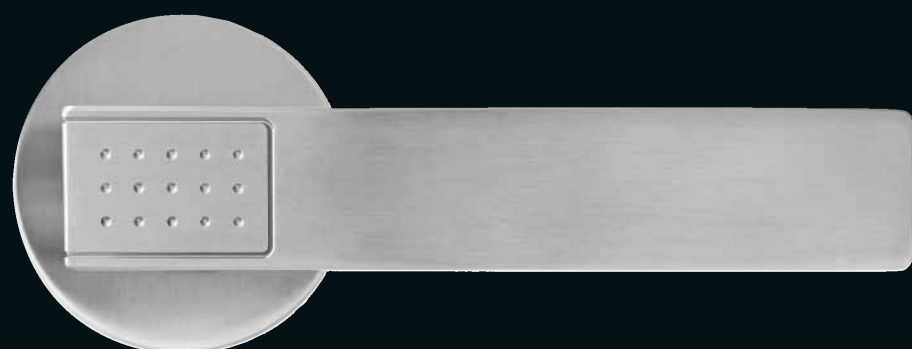

**The difference is that there is no difference.**

**DORMA Premium offers identical rose and backplate heights.**

Only once all the shapes in the room are in harmony will the ambience enthrall. And sophisticated detail can only contribute further to this feeling of perfection. DORMA Premium makes a

major contribution to such synchronicity. All the covers of the roses and backplates, whether for timber or narrow stile doors, have a uniform height of just 9 mm. In keeping with DORMA's commitment to provide contemporary hardware for high quality building designs.

Premium 8870

Premium 8871

Premium 8871 V

## Premium fittings in the DORMA Contur design.

### Making the right impression throughout the building.

Demanding projects are characterised by the visual integrity of their design details. Such an effect can be enhanced by Premium door furniture in the DORMA Contur design. Their cubic form with hallmark perforations are the primary elements

characterising this style. The clear, unassuming lines express independence and quality craftsmanship. Thanks to their matching styles, these lever handles can be incorporated particularly elegantly within the overall project design, contributing to the integrity of its appearance and the clarity of its overall aesthetics.

Premium lever handles in this style can also be visually coordinated with the other DORMA products featuring the DORMA Contur design, many of which have garnered prestigious design awards.

### Note:

The combination of the Premium 8870 lever handle with the PORTEO door assistant provides an indication of how coordinated door solutions incorporating the DORMA Contur design can enhance the harmonised appearance of sophisticated project builds.

# CREATE

Your inspiration provides the project platform.

Your design is converted into a 1:1 prototype.

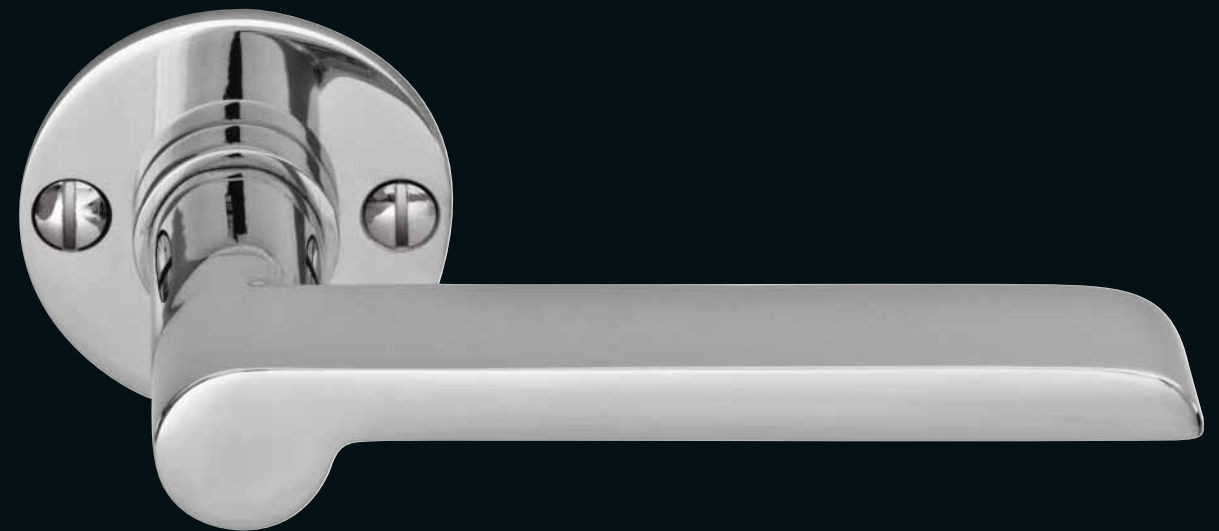

Regular dialogue – from optimisation to approval for production.

## DORMA Create. Making something special.

### Committed to individuality.

DORMA Create provides conceptual scope for translating creative ideas into reality, giving architects and designers a unique opportunity to design their own pull handles, lever handles and window hardware. Individual and unmistakable, tailor-made for each specific

project. Based on these designs, DORMA manufactures superlative products, in small-batch, high quality production volumes if required. In so doing, we unite high tech and craftsmanship to produce aesthetically perfected solutions.

### Premium 8928

## Meeting individual requirements the systematic way: The practical DORMA modular approach.

### Offering significant benefits to installers and the trade.

The DORMA modular system as applied to the Premium range of door furniture facilitates an impressive array of technically sophisticated solutions. With it, identical lever handles can be used in combination with precisely matched roses, escutcheons and backplates for use on timber, narrow stile and toughened glass doors, very much in line with the DORMA brand promise of user friendly door furniture solutions. The system comprises three components that can be flexibly combined

with one another: lever handles, roses/backplates and a square section spindle.

### Special characteristics/ advantages:

#### 1. Fast and fuss-free

The components are supplied as individual building blocks. That means that the roses, escutcheons and backplates can be pre-fitted onto the door in the factory or workshop while leaving the lever handles separate. This saves space when transporting the doors to site. During the building work, the doors can be fitted with tem-

porary site handles. This avoids the problem of damage or contamination of the Premium lever handles, which can then be clicked into place together with their square-section spindles just before the building undergoes its final inspection.

#### 2. Flexible

With this modular system, spindles for different door thicknesses can be separately ordered. This simplifies planning and also the handling work on site. If the door thicknesses are found to be not as specified, all that is required is that the spindle of the right

length be selected rather than having to replace the complete furniture set.

#### 3. Simple

The DORMA Premium roses, escutcheons and backplates are non-handed whether with or without springing. This prevents the occurrence of on-site installation mistakes.

#### 4. Versatile

Long support lugs on the roses enable large door thickness increments to be bridged with just a few fixing screw lengths.

## Combined elegance.

### The advantages of mixing and matching.

The lever handles from the Premium door furniture range can be combined with various DORMA products:

#### 1. Anti-tamper fittings of Series SI 17xx, class of protection ES 1-ZA (DIN 18257) and S2-ZA (EN 1906)

A combination that unifies the security of a fully compliant anti-tamper fitting (certified according to one of the above standards) with the high resilience and flexibility of Premium project door furniture. The external backplate is simply combined with the Premium lever handle and Premium rose on the inside of the door, this securely bushed internal assembly ensuring enduring stability.

#### 2. Panic hardware DORMA PHA System 2500 (EN 1125)

The functional reliability and safety of emergency exits and escape routes is assured by the combination of a technically sophisticated Premium lever handle assembly and the DORMA Panic Hardware system.

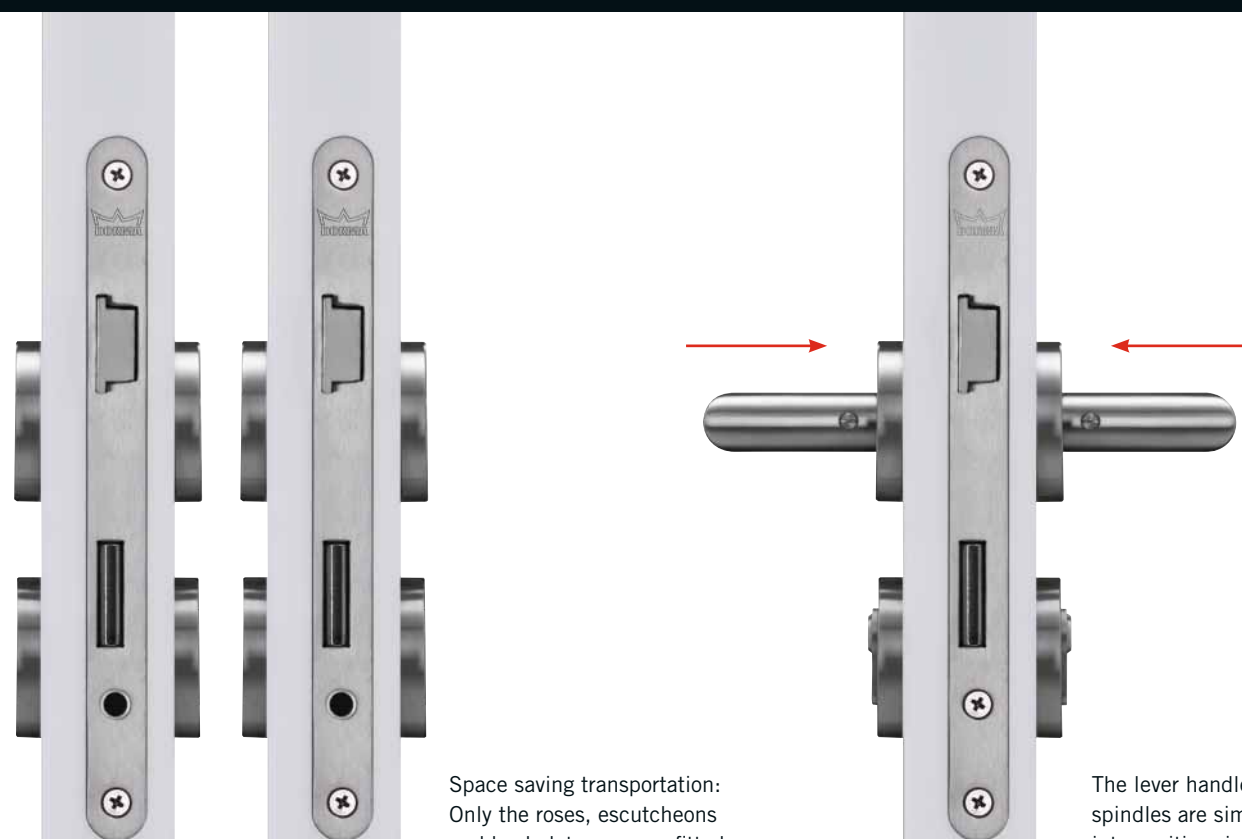

#### 3. Toughened glass door furniture with DORMA-Glas locks and MAME glass doors

Glass doors give a building modernity, elegance and illuminated spaciousness – special qualities that can only be enhanced by DORMA Premium door furniture in combination with DORMA locks for perfect harmony down to the last detail.

#### 4. Access control XS cylinders

A combination that effectively and attractively marries design elegance with flexible access control. Irrespective of the door situation or the application requirements, the modular design of the XS cylinder enables it to be installed as a europrofile or round cylinder, or even a cylinder compliant with the SIS standard.

Space saving transportation:  
Only the roses, escutcheons  
and backplates are pre-fitted  
to the door.

The lever handles and  
spindles are simply clicked  
into position right at the  
end of the process.

## A range with quality.

For timber doors

For narrow stile doors

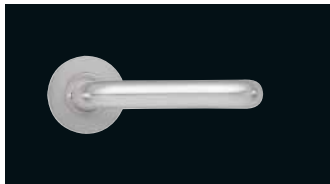

### Design and craftsmanship with DORMA Pure.

Sophisticated design and quality characterise the DORMA Pure range, a line in fittings that excels in terms of its technology and functional reliability. DORMA Pure handles and knob furniture

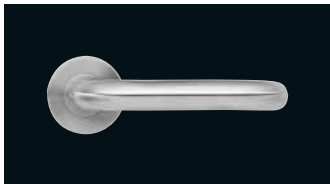

and accessories are carefully crafted from high grade materials, satisfying exacting demands with respect to stability, safety and corrosion resistance. The Pure range includes the most popular models, all of which are sprung in order to return the lever handle to the horizontal position.

### Materials of note.

Aluminium or stainless steel? Irrespective of which material you choose, with DORMA Pure you can be sure of a fitting of contemporary excellence.

## DORMA Pure: designed for daily use.

### Practical and flexible.

The lever handle and its steel mounting are securely bushed in the factory, with the roses and backplate covers supplied loose for simple clip-on assembly during installation.

### Included in the Pure range:

- Roses and backplates with integral springing
- For standard, entrance (knob and handle) and WC doors.
- Profiles are available to suit PZ (euro-profile), BB (warded key), WC (bathroom lock) and UN (latchplate)
- Mountings with support lugs for timber fittings
- For door thicknesses from 38 to 56 mm
- One screw length for these door thicknesses
- 8 mm spindle
- EN 1906  
Category of use: Grade 3  
Corrosion resistance: Grade 4
- EN 1634-1
- When used with fire and smoke check doors, additional national regulations must be satisfied (where applicable).
