

# INNOVATIVE SURFACES FOR INSPIRED INTERIORS

## ABOUT SONITE

Sonite is a new dimension in contemporary interior design. It is a completely new category of surface coverings that combines the style of mosaic tiles with the versatility of modern technology. Blending the ancient with the modern, Sonite is an innovative new interior design material that is made for contemporary and future living.

## PATTERNS AND TEXTURES

- Diversity of patterns - Sonite is not limited to one shape. It can be free form and created in any shape.
- Designers can pick and choose different colors and patterns, and combine them to produce unique designs for each project.
- Depth of the texture – flow in each tile and mosaic chip is unique giving a natural feel to the material.

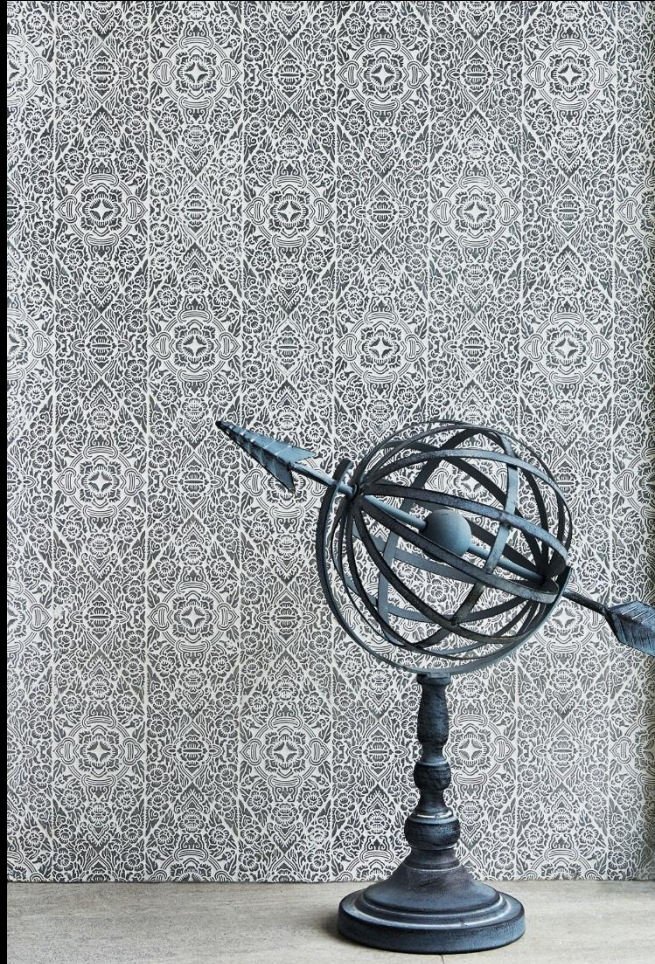

Sonite offers designers a myriad of patterns to choose from...

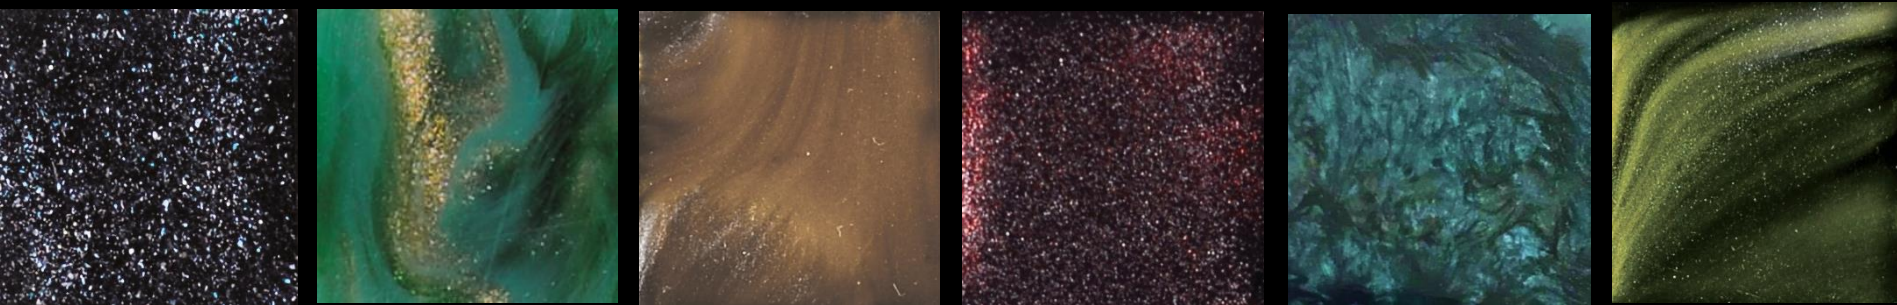

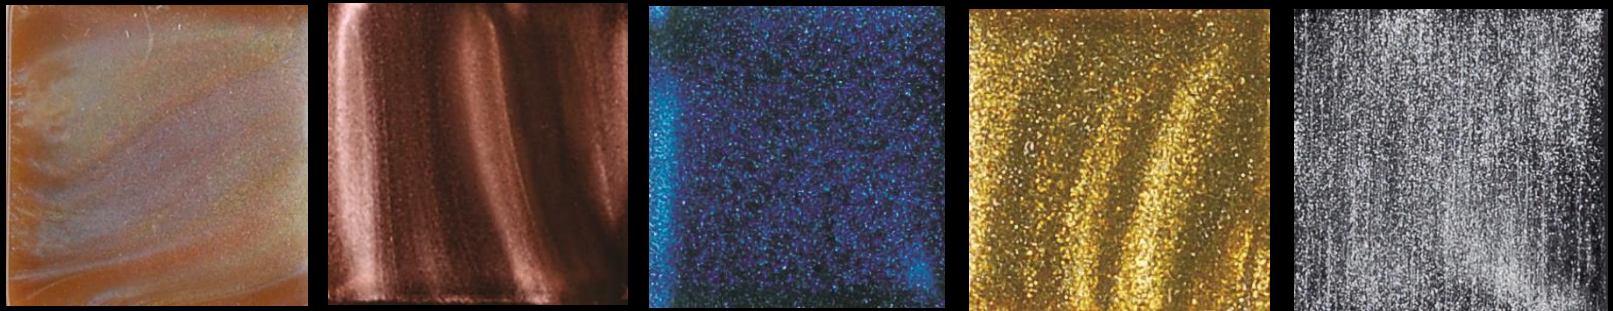

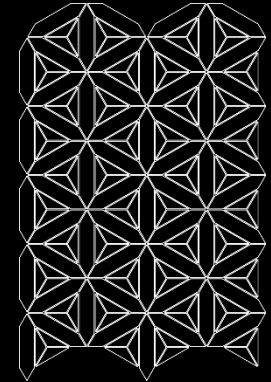

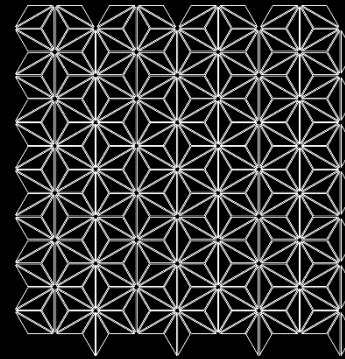

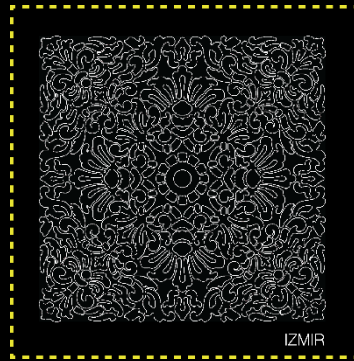

... As well as hundreds of textures and colors.

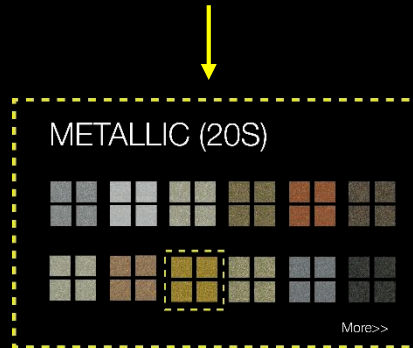

# FULLY CUSTOMIZED

Step 1 : Select your design

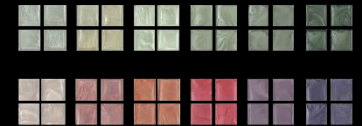

Step 2 : Select your series and colors

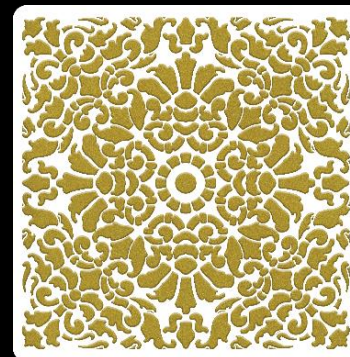

KAREI (61S)

TROCHUS (11S)

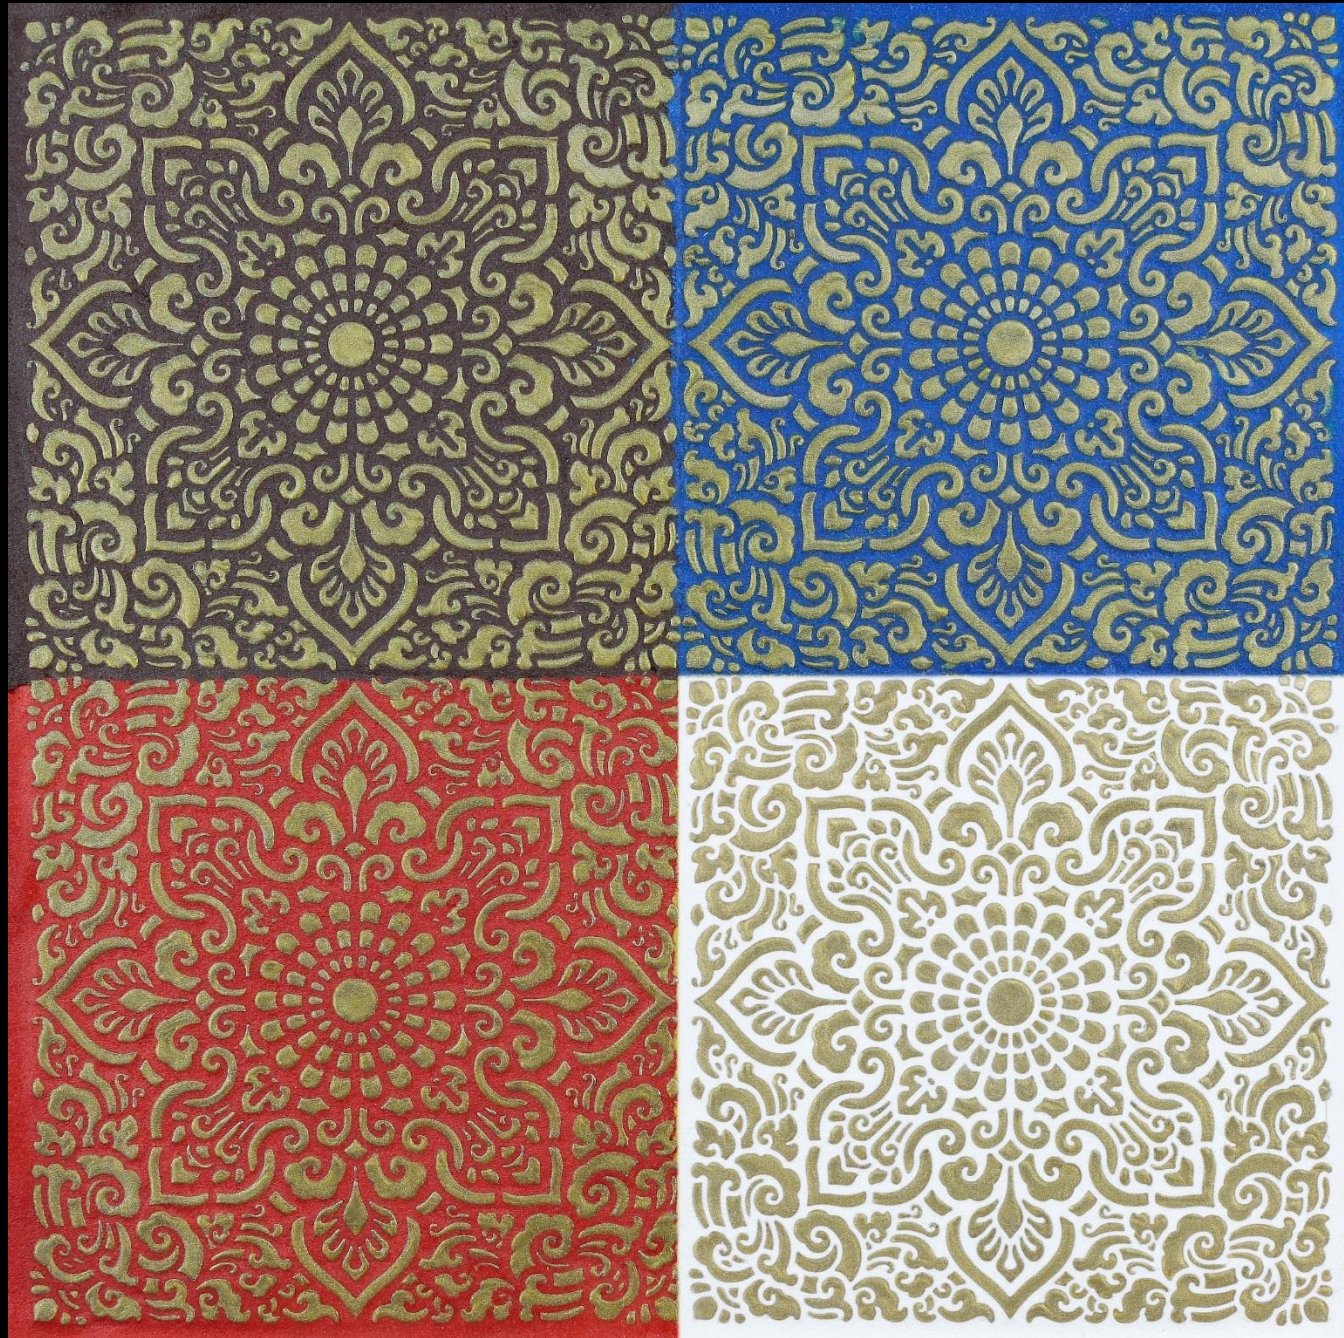

Step 3 : Customized mosaic

Combine striking grout colors to add another level of detail.

## BESPOKE SERVICE EASY AS STEP 1,2,3

Create unique, detailed works of art with Sonite's customized cut for enhanced clarity.

Step 1 : Provide us with your graphics

Step 2 : Digitization

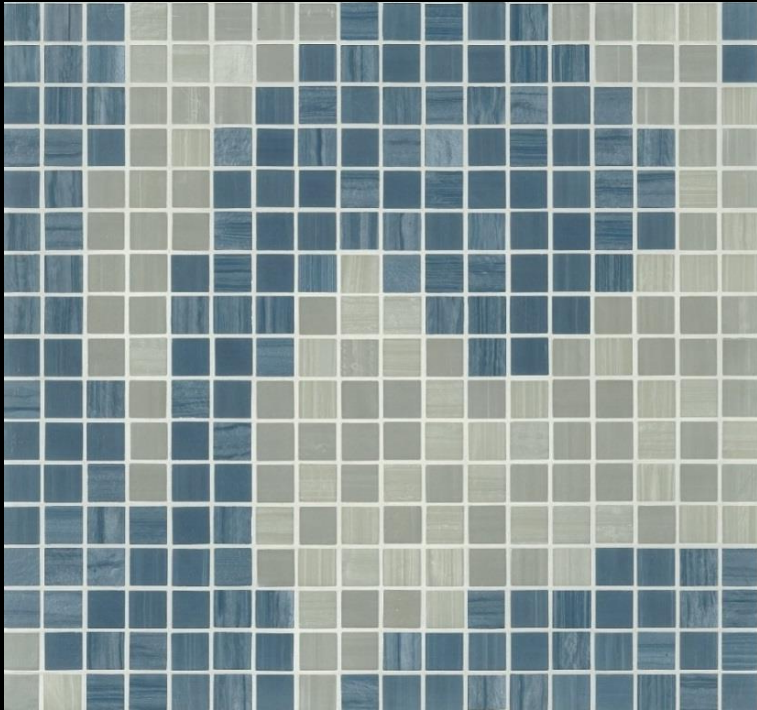

Step 3 : Finished mosaic with Sonite's customized cut

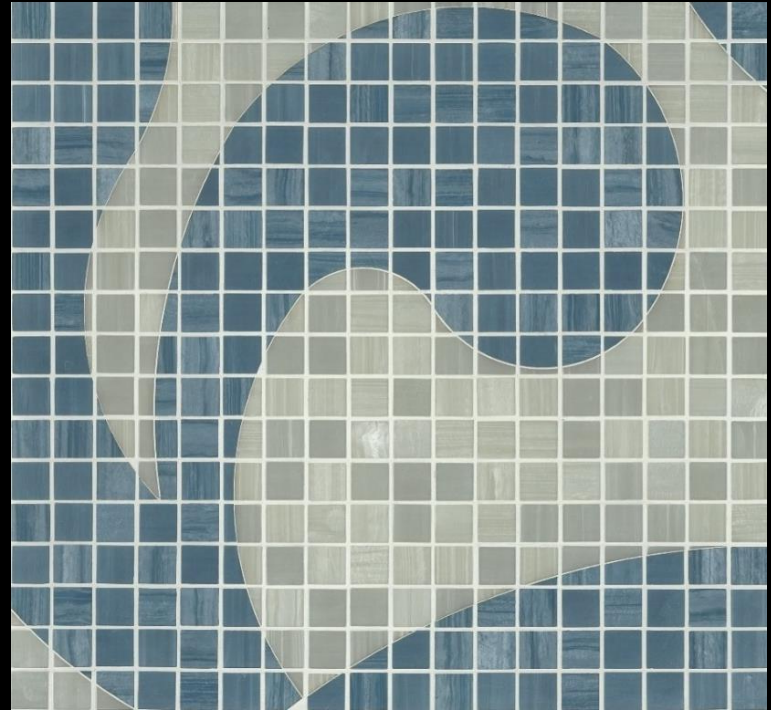

# PERSONALIZATION WITH SONITE BESPOKE SERVICE

## SONITE CUSTOMIZED CUT VS. CONVENTIONAL PIXELATED MOSAICS

### CONVENTIONAL PIXELATED MOSAICS

Most mosaic manufacturers rely on a “pixelated” technique to achieve they design. This result in a blurred, jagged composition.

### SONITE CUSTOMIZED CUT

Sonite’s customized cut results in precise details for enhanced beauty.

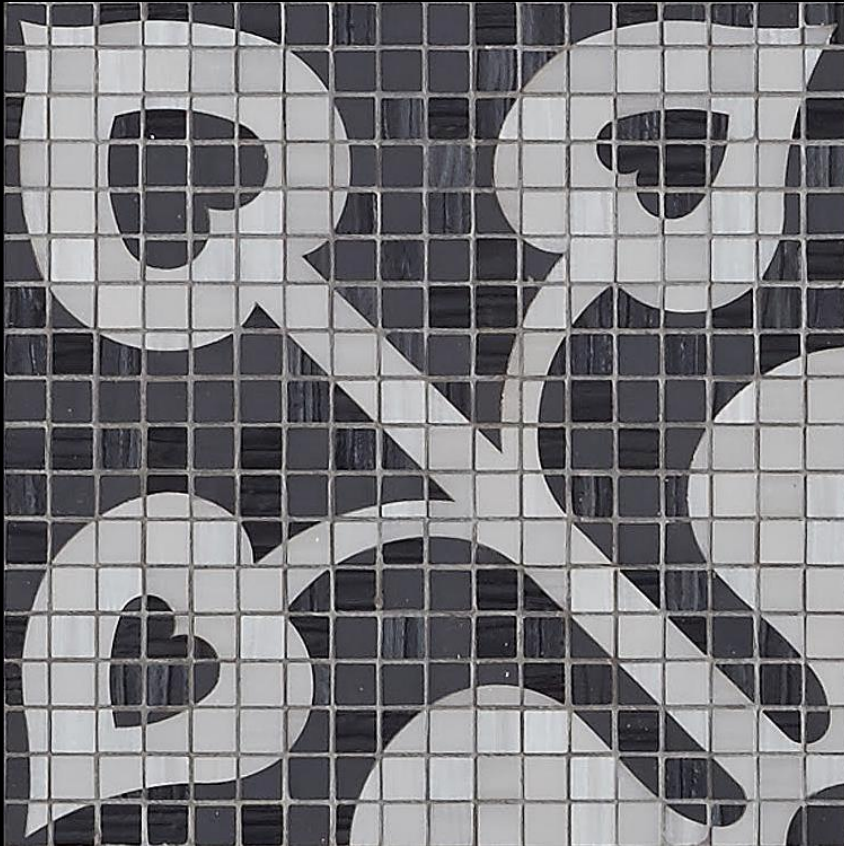

Bespoke service can also be done by combining different patterns and colors. (Supernova /Honeycomb)

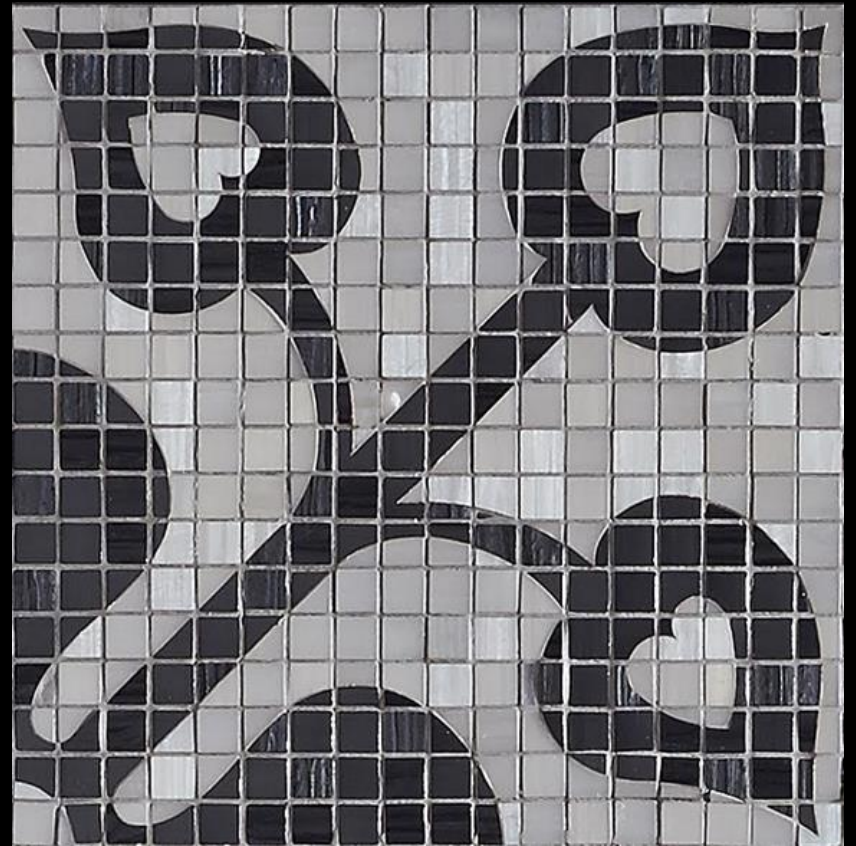

# MAXIMIZE BUDGETS

There is no waste material from this unique positive/negative process as when the pattern is precisely cut, the removed portions are then used to create a 2<sup>nd</sup> inverse colorway. By working in this manner, we are able to maximize the material usage while minimizing our clients' overall cost.

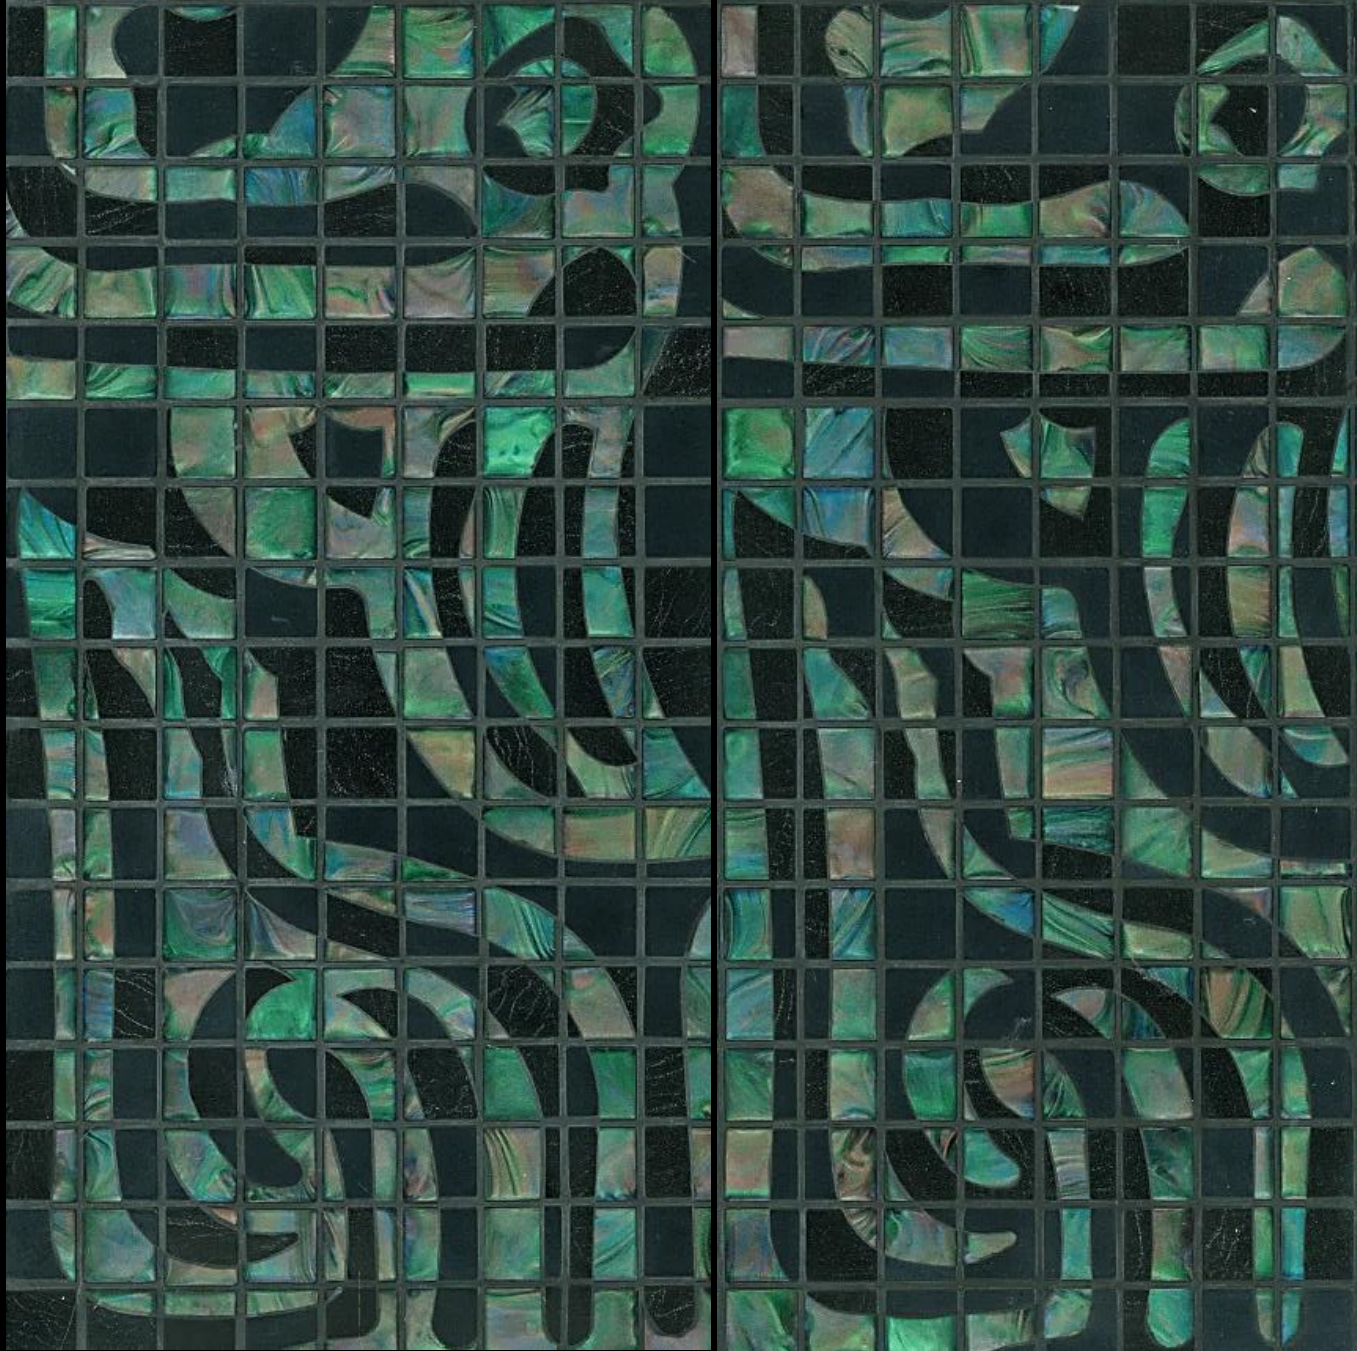

POSITIVE

NEGATIVE

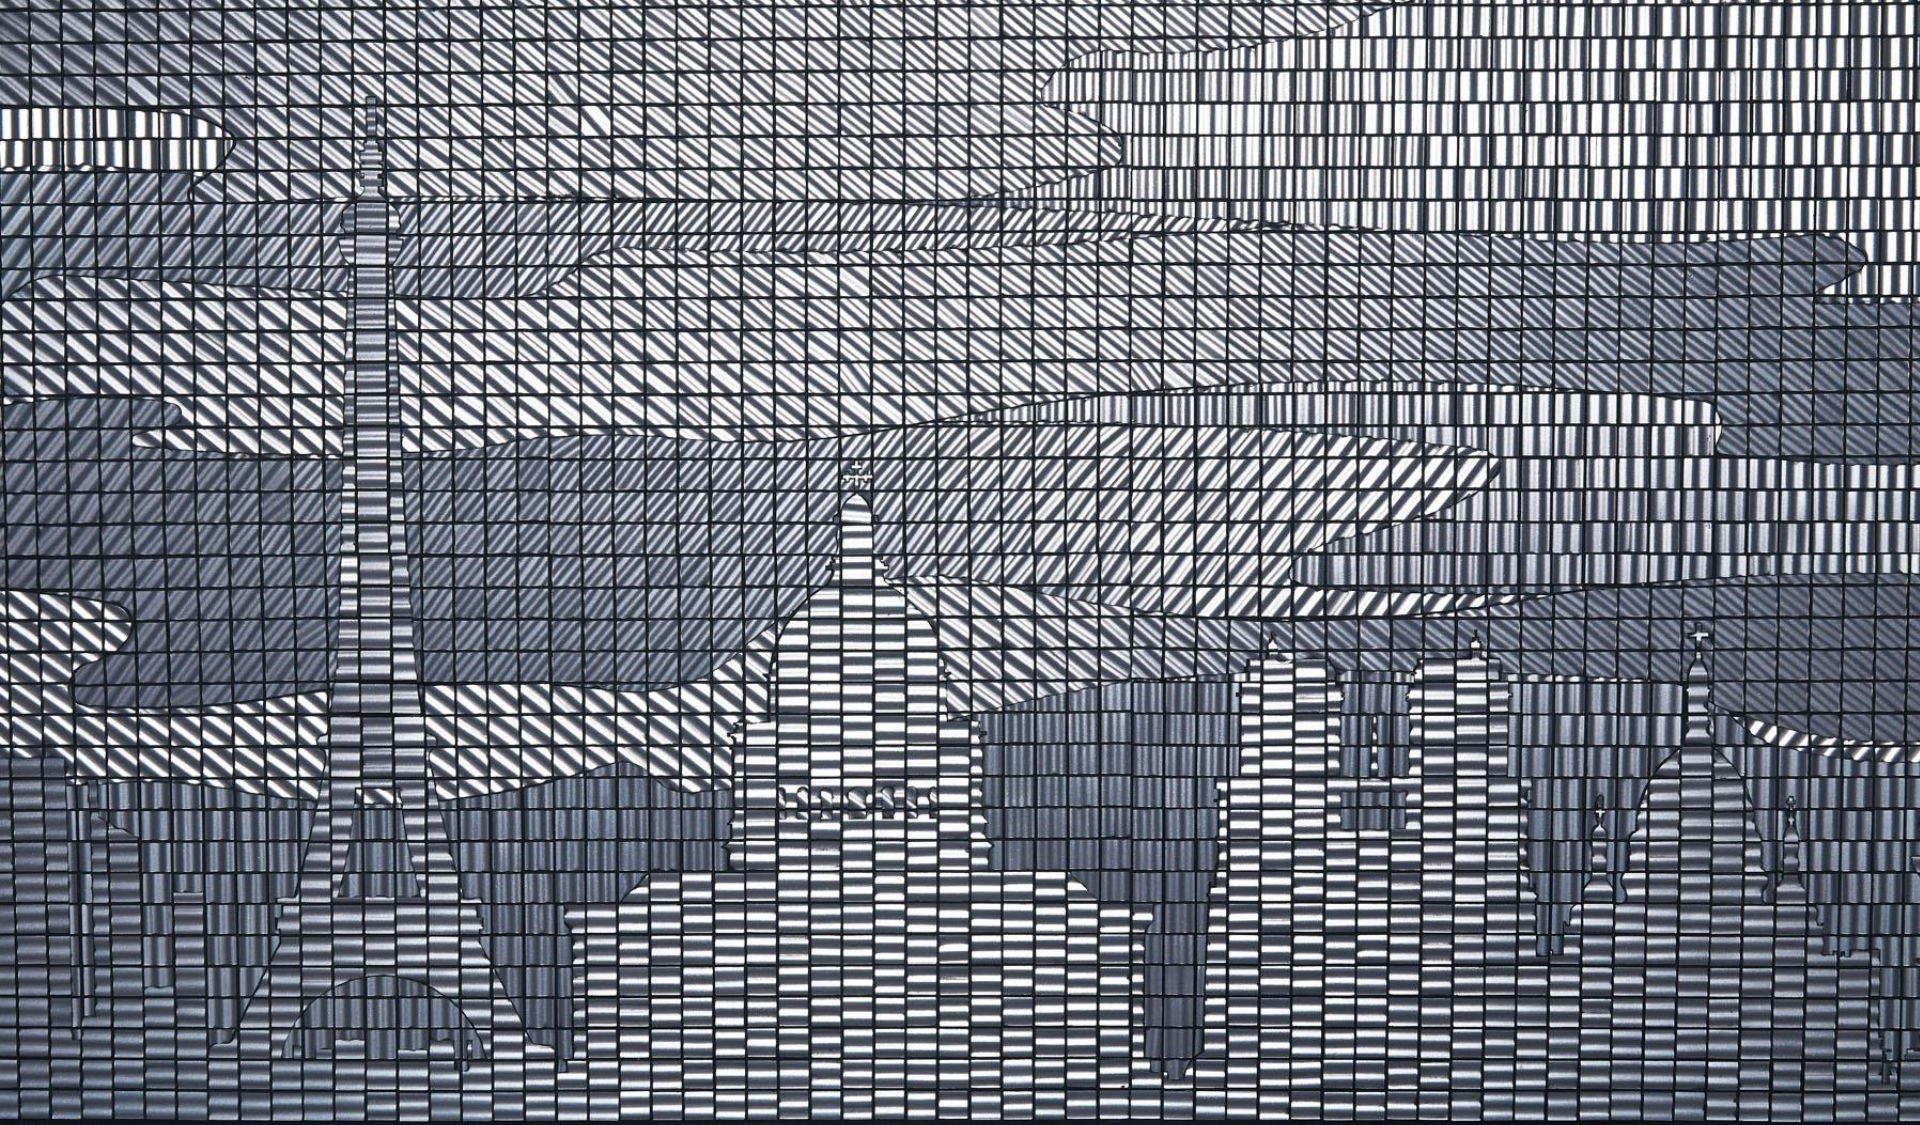

POSITIVE

NEGATIVE

Bespoke design using Nami mosaic - Nami series mosaic feature an undulating profile/surface that imbues movement and a sense of depth to interior surfaces. The light-shifting design comes in range of dynamic colors for adding waves of vitality to room and spaces.

## VERSATILITY

Sonite is more than a producer of mosaics and tiles for wall decoration. Indeed, since its founding the company has pursued a wider vision for its products, aiming always to create unrivalled surface coverings and designs for diverse applications. Among recent developments are prototypes for table top, bathtub and sculpture pieces.

Sonite mosaics can be easily and neatly installed on curves area such as bathtub without the need for chamfering.

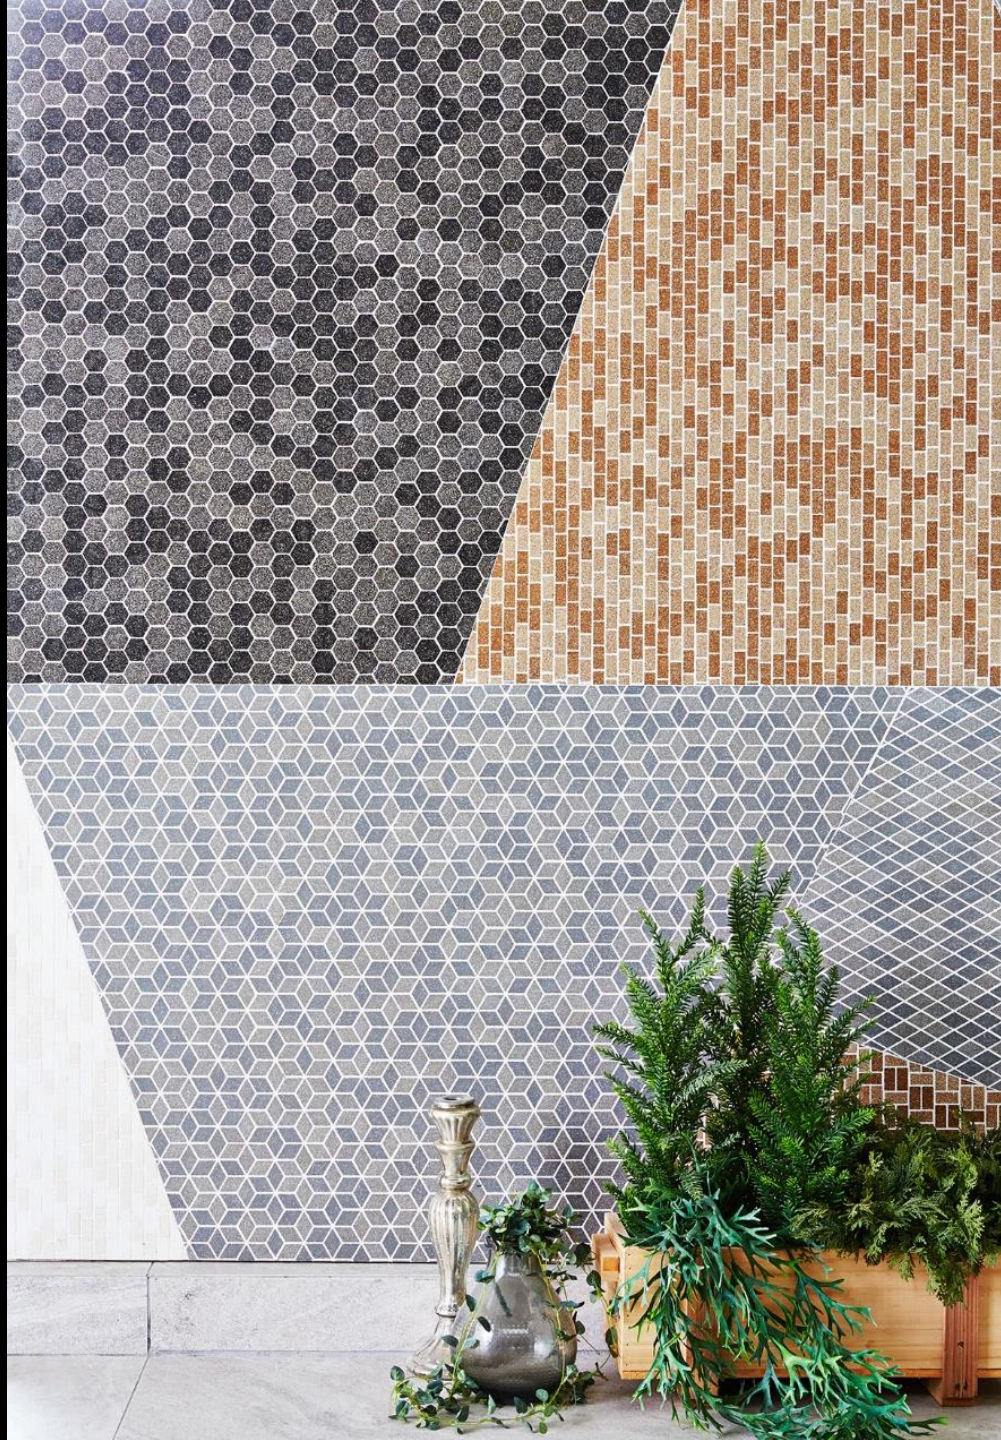

## ECO-FRIENDLY MOSAICS

- Rated very low A+ score with VOC's emissions.
- Low carbon footprint.
- The bio composite "Husk" collection recycles rice husks into mosaics and tiles that are both appealing and environmentally friendly.
